Futures trading is speculative and is not suitable for all customers. Past results are not necessarily indicative of future results. This document is for information purposes only and should not be construed as an offer, recommendation or solicitation to conclude a transaction and should not be treated as giving investment advice. Auspice Capital Advisors Ltd. makes no representation or warranty relating to any information herein, which is derived from independent sources. No securities regulatory authority has expressed an opinion about the securities offered herein and it is an offence to claim otherwise. *The performance of Auspice Broad Commodity Index prior to 9/30/2010 is simulated and hypothetical as published by the NYSE. See Important Disclaimers and Notes on last page.

SUMMARY

Commodities softened given uncertainty of global trade and the US Fed. Gold and WTI Oil moderated with Gold gaining 0.80% and WTI Oil flat while Grains struggled with Wheat and Corn falling over 5%. The energy weighted GSCI was off 0.41% while the more diverse Bloomberg Commodity index lost 0.87%.

Global markets equity markets moderated after June gains as US-China trade tensions escalated and we got closer to the month-end US Federal Reserve meeting. The S&P gained 1.31%, Nasdaq 2.11% while the MSCI World added only 0.42% and the resource tilted Canadian TSX/S&P60 was flat. The struggling Energy sub-index continued to fall 3.18% despite a strong heavy-oil market versus WTI.

On July 31st, the US Fed cut rates for the first time since the 2008 financial crisis. While anticipated, the policy statements highlighted concerns in the global economy creating a volatile difference of opinions. As such US bond futures were neutral into the close on the 31st while the US dollar strengthened vis-à-vis most global currencies.

RESULTS

The Auspice Broad Commodity program softened 0.27% in July. This was in-line for the month but lags the year-to-date bounce back of the long-only benchmarks. It is similar over last eight months (see Historical Growth chart) but importantly protected the sharp December correction.

The ABCERI long-term results (12 year) and annualized returns (since 2007) are the only positive results amongst comparables and in line with equity benchmarks long term (Table 1).

OUTLOOK

While there is rhetoric and debate over the significance of the US Fed rate cut, we believe a few things are important. First, the difference of opinion on the matter will increase volatility in financial and commodity markets. We have seen this in the days post month end. Second, commodities historically do well near the end of a prolonged economic cycle. The Fed has signaled this concern. Third, protecting portfolios from unexpected inflation is important and this is ideally done with commodities directly (versus resource equity).

As such, we reiterate the benefit provided by a tactical commodity strategy that has far less downside risk than other approaches is an important component to a diversified portfolio especially as inflation begins to appear while economies slow.

Chart 1 HISTORICAL GROWTH SINCE 2007

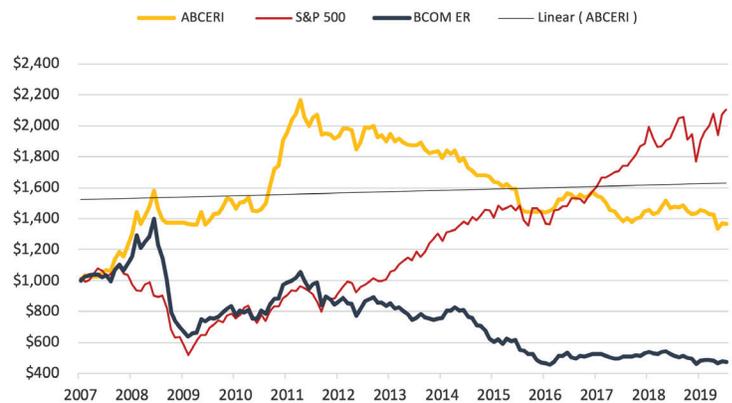

Table 1 ABSOLUTE PERFORMANCE

	ABCERI	BCOM ER	S&P GSCI ER	S&P 500
1 Month	-0.27%	-0.87%	-0.41%	1.31%

Worst Drawdown	-38.34%	-67.41%	-81.12%	-52.56%

HISTORICAL GROWTH OF A \$1,000 INVESTMENT

ATTRIBUTIONS AND TRADES

The only change to the portfolio was adding Silver alongside Gold to the precious metals sector.

The portfolio is now long 5 of 12 commodity components (or 42%) and includes all 3 sectors, Energies, Ags and Metals (see Chart 3). This still allows for significant growth of position if the tactical opportunity develops.

The portfolio made gains in Metals which was offset by Ags as long exposures in corn and wheat pulled back results. See Chart 2.

SECTOR HIGHLIGHTS

ENERGY

While petroleum energy market was mixed, gains from the sole long exposure in Gasoline added value. Remain on the sidelines in Natural Gas which remains weak.

METALS

Precious metals had a strong month on the back of Gold and newly added Silver. Remain on the sidelines in Copper which managed a small gain into month end.

AGRICULTURE

The Ag sector provided a loss as long Grains reversed with Wheat and Corn falling near 8% and 6% respectively. Remain on the sidelines in Softs which remain weak.

WHY AUSPICE INDICES

The Auspice Indices are designed to meet the needs of investors that are looking to participate in liquid alternatives through a disciplined approach without sacrificing performance, diversification, and transparency. We believe Auspice Indices encompass everything from alpha to beta, across a return continuum. The indices blend elements of active management and indexing into a transparent, published, single strategy rules-based approach.

STRATEGY DESCRIPTION

The Auspice Broad Commodity Index aims to capture upward trends in the commodity markets while minimizing risk during downtrends.

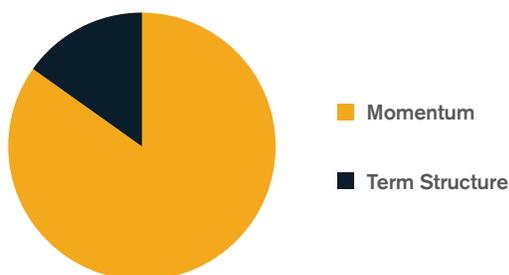

The index is tactical long strategy that focuses on Momentum and Term Structure to track either long or flat positions in a diversified portfolio of commodity futures which cover the energy, metal, and agricultural sectors. The index incorporates dynamic risk management and contract rolling methods. The index is available in total return (collateralized) and excess return (non-collateralized) versions.

THE MAIN POINTS OF DIFFERENTIATION INCLUDE:

Auspice Broad Commodity combines tactical commodity exposure with capital preservation. We believe that traditional passive long-only commodity indices do not provide investors with an optimal long term investment solution.

- Seeks to capture upward trends in the commodity markets while minimizing risk during downtrends
- Tactical exposure to a diversified basket of commodities that can individually position long or flat (no position)
- Rules-based quantitative methodology combined with dynamic risk management and contract roll optimization to deliver superior returns

RETURN DRIVERS

AUSPICE BROAD COMMODITY INDEX

- Long / Flat Approach
- Positions can be changed on an intra-month bases
- Accounts for Short-term Price Trends
- Practices a Smart Roll-Yield to minimize impact of contango and backwardation
- Broadly diversified (when exposed) and less concentrated in any one commodity sector
- Rebalanced monthly based on volatility of each underlying commodity

LONG-ONLY COMMODITY INDICES

- Long-Only Approach
- Positions are always 100% long
- Doesn't take into account downward price trends
- Contracts typically roll into next contract month
- Poorly diversified amongst single sectors
- Most rebalance annually based on predetermined weightings for commodity sector

COMPARABLE INDICES

*Returns for **Auspice Broad Commodity Excess Return Index (ABCERI)** represent returns calculated and published by the NYSE. The index does not have commissions, management/incentive fees, or operating expenses.

The Bloomberg Commodity (Excess Return) Index (**BCOM ER**), is a broadly diversified index that allows investors to track 19 commodity futures through a single, simple measure.

The **S&P/TSX 60 Index** is designed to represent leading companies in leading industries. Its 60 stocks make it ideal for coverage of companies with large market capitalizations and a cost-efficient way to achieve Canadian equity exposure. Price Return data is used (not including dividends).

The **S&P 500** is an index of 500 stocks chosen for market size, liquidity and industry grouping, among other factors. The S&P 500 is designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe. Price Return data is used (not including dividends).

The (**MSCI**) **World Index**, Morgan Stanley Capital International, is designed to measure equity market performance large and mid-cap equity performance across 23 developed markets countries, covering approximately 85% of the free float-adjusted market capitalization in each. This index offers a broad global equity benchmark, without emerging markets exposure.

Excess Return (ER) Indexes do not include collateral return.

The S&P Goldman Sachs Commodity Excess Return Index (**S&P GSCI ER**), is a composite index of commodity sector returns representing an unleveraged, long-only investment in commodity futures that is broadly diversified across the spectrum of commodities.

The **SG CTA Index** provides the market with a reliable daily performance benchmark of major commodity trading advisors (CTAs). The SG CTA Index calculates the daily rate of return for a pool of CTAs selected from the larger managers that are open to new investment.

The **Barclay BTOP50 CTA Index** seeks to replicate the overall composition of the managed futures industry with regard to trading style and overall market exposure. The BTOP50 employs a top-down approach in selecting its constituents. The largest investable trading advisor programs, as measured by assets under management, are selected for inclusion in the BTOP50.

The CTA indexes do not encompass the whole universe of CTAs. The CTAs that comprise the indices have submitted their information voluntarily and the performance has not been verified by the index publisher.

PERFORMANCE NOTES

The Equity benchmarks used in this material are intended to reflect the general equity market performance. They are shown to illustrate the non-correlated attributes versus other assets. Adding non-correlated assets within a portfolio has the potential to reduce portfolio volatility and drawdowns.

The performance of Auspice Broad Commodity Index prior to 9/30/2010 is simulated and hypothetical as published by the NYSE. All performance data for all indices assumes the reinvestment of all distributions. To the extent information for the index for the period prior to its initial calculation date is made available, any such information will be simulated (i.e., calculations of how the index might have performed during that time period if the index had existed). Any comparisons, assertions and conclusions regarding the performance of the index during the time period prior to the initial calculation date will be based on back-testing.

These results are based on simulated or hypothetical performance results that have certain inherent limitations. Unlike the results shown in an actual performance record, these results do not represent actual trading. Also, because these trades have not actually been executed, these results may have under-or over-compensated for the impact, if any, of certain market factors, such as lack of liquidity. Simulated or hypothetical trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to these being shown. The index does not have commissions, management/incentive fees, or operating expenses.
